## INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/AU2004/001020

**Box No. V** Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

## 1. Statement

Novelty (N)	Claims 1-13	YES
	Claims	NO
Inventive step (IS)	Claims 1-13	YES
	Claims	NO
Industrial applicability (IA)	Claims 1-13	YES
	Claims	NO

## 2. Citations and explanations (Rule 70.7)

**Novelty (N) and Inventive Step (IS) claims 1-13:**

D1 US 5373483 A (BURKE) 13 December 1994

The claimed invention discloses a sonar antenna. This equipment is used for underwater echo sounding and uses hydro acoustic transducers to ensonify the water and receive echoes. The sonar antenna is shaped to allow continuous coherent ensonification such that the power in the echo returned from a uniform flat sea floor is substantially constant.

The features of the claimed invention are not found in any single document or in any obvious combination of documents, published before the earliest priority date of the claims. Therefore the claimed invention is considered to be novel and to involve an inventive step.

**Industrial Applicability (IA) claims 1-13:**

Claims 1-13 relate to a sonar antenna for measuring echoes in an underwater environment and as such considered industrially applicable.
